

Team Green: Meeting Scheduler System

The Buzzword Software Solutions Limited Executive department has requested a software system to manage use of the meeting rooms and the video presentation systems within the company.

Requirements:

- the ability to add/update/delete a single room
- the ability view the list of meeting rooms
- the ability to view the meeting room assignments
- a manager is allowed to cancel or override an assignment
- the ability to link multiple video reservations into a single assignment

Critical Data Fields

- the room location
- the room type
- the assignment date and time period
- the manager requesting the assignment
- the local timezone for the location and GMT time for video meetings
- the additional video reservation attached to a video reservation along with the local timezone for that location
